Giordi Fungula

Software Developer

Experienced Software Developer with over 2 years of experience in the Software Industry including my time as a Mentor and Coding Instructor with Hyperion Development.

Education

UNIVERSITY OF SOUTH AFRICA | 2021 - 2024

Majoring in BSC Computing with focus in Software and Information Systems.

Experience Work

CODING MENTOR AND INSTRUCTOR
2019 - 2020 | Hyperion Development

Facilitated, organized and assisted students with their progression of the Web Development and Software Engineering Bootcamps.

Assisted with the delivery of in-person lectures for Web Development students for our onsite Bootcamp when we did not have a Web Dev Lecturer for our onsite Bootcamp.

SOFTWARE DEVELOPER
2020 - 2021 | Symbionix

Developed and gained a good understanding of how to rapidly develop applications on a full-stack basis using JS.

Developed Full-stack Applications that ranged from different industries like events, vehicle licensing, logistics and finance.

Collaborated with team members to establish project goals, projections and milestones.

SOFTWARE DEVELOPER

2021 - Current | Enlabeler

Currently developing features on top of a open source tool called CVAT that Enlabeler uses to annotate images and videos.

Currently assisting an existing client to develop front end pages due to missing in-house skills when it comes to React JS.

About Me

Enthusiastic technical professional with a developing understanding of the entire software development lifecycle. Trained in Javascript and Web Development with a focus on React and Node JS (using framework called Feathers JS)

Skills

HTML

CSS

React JS

Node JS

Typescript
